

Benefits: secure, tidy
Tools: wire cutters,
crimping pliers

1. Slide crimp tube onto wire,
pass wire through jumpring or
clasp and back through crimp
tube.

2. Notice the two sets of openings on your crimping pliers.

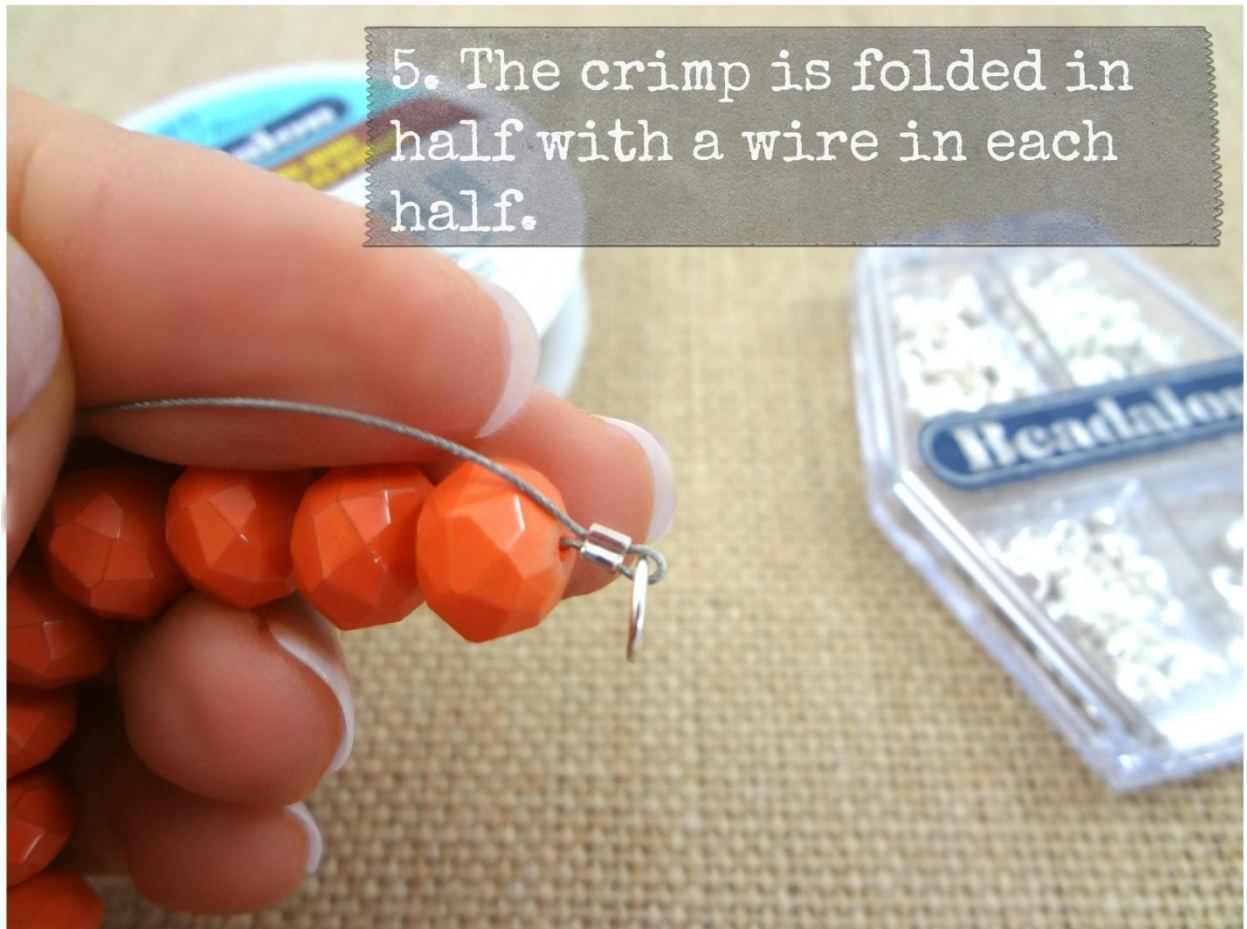

3. Using the outer jaw, form an oval, making sure not to cross the wires.

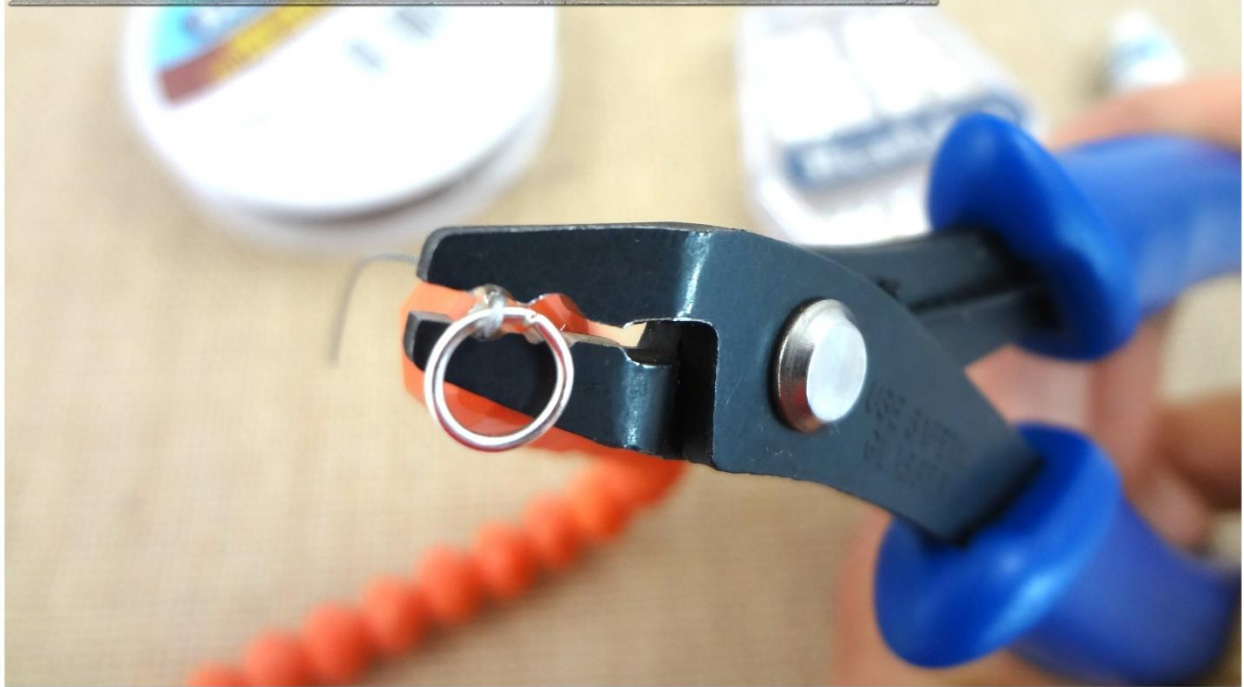

4. Crimp in inner jaws
of crimping pliers.

5. The crimp is folded in
half with a wire in each
half.

6. Turn the crimp 90 degrees, place it in the pliers, and crimp to fold in half again.

8. ...you can add a crimp cover for a professional look. Just use crimping pliers to pinch the c-shaped cover over your crimp.
