

Colores™ Doming Resin Pendant

Take your favorite images and make them larger than life with the magnification effect of doming resin.

steps:

1. Make a paper template that matches the size of the **pendant's frame**. Find an **image** you like and use a **soft-grip cutting knife** to cut out the image to the size of the template. Place the image in the pendant frame.
2. Treat the image so it doesn't bleed when you add the resin by painting a layer of **white craft glue** over the entire image, making sure to go all the way to the edges. The glue will dry clear.
3. While the glue is drying, use a **popsicle stick** to mix the **doming resin** according to the directions. As you stir the resin, it will turn milky white; continue to stir for about two minutes until the resin is clear, then let it sit for 5 minutes.
4. Set the pendant on top of two flat popsicle sticks to keep it level. Using a **toothpick**, place a drop of the doming resin in the center of the image. The resin will begin to creep to the edges, naturally forming a dome. Continue to place drops near the center and allow the resin to fill in the frame. As you add resin, use the toothpick to pop any bubbles that may appear. **Note:** You do not need to add resin all the way to the edges; for the best effect, simply allow it to fill in and form the dome shape on its own.
5. Protect the pendant from dust by covering it with the mixing cup from the kit, and allow it to dry for 24 hours (15 minutes after it begins drying, check once more for bubbles and eliminate if necessary). To speed up the process, place the pendant in a toaster oven at 150°F; it should dry in about two hours.
6. Slide the pendant onto the **sterling curb chain**.

supplies:

Description	Order #	Qty.
Colores™ Doming Resin Kit	623-014	1
Sterling pendant frame, 18 x 12.8mm	696-878	1
Sterling diamond-cut curb chain, 1.8mm, 18"	632-353/18	1
Soft-grip cutting knife	—	—
Toothpicks	—	—
White craft glue	—	—
Small paint brush	—	—
